

OSSP_pipes

FIFO program

```
GNU nano 8.7.1
#include <stdio.h>
#include <sys/types.h>
#include <sys/stat.h>

int main()
{
    if (mkfifo("myfifo", 0666) == -1)
    {
        perror("mkfifo");
        return 1;
    }

    printf("FIFO created\n");

    return 0;
}
```

```
The reading end of the pipe is closed.
hemasai@Hemasai:~/OSSP_Assignment$ nano Sigsegev.c
hemasai@Hemasai:~/OSSP_Assignment$ gcc Sigsegev.c -o Sigsegev
hemasai@Hemasai:~/OSSP_Assignment$ ./Sigsegev
Program started.
Trying to access invalid memory...

SIGSEGV received!
Invalid memory access detected.
hemasai@Hemasai:~/OSSP_Assignment$ nano FIFO_CREATE.c
hemasai@Hemasai:~/OSSP_Assignment$ gcc FIFO_CREATE.c -o FIFO_CREATE
hemasai@Hemasai:~/OSSP_Assignment$ ./FIFO_CREATE
FIFO created
hemasai@Hemasai:~/OSSP_Assignment$ ls -l myfifo
prw-r--r-- 1 hemasai hemasai 0 Oct  7 05:02 myfifo
